A vibrant blue ink splash is positioned in the upper right corner of the page. The splash is dynamic and textured, with various shades of blue and white, creating a sense of movement and energy. The background of the entire page is a light blue hexagonal grid pattern with small blue dots at the intersections, giving it a scientific or molecular feel.

# **OXFORD LAB FINE CHEM LLP**

**Dear Valued Customers,**

We at "OXFORD LAB" would like to thank you for all your valuable support and for outstanding business for the year 2019-2020.

With the expansion of business since decades of expertise in the field of Laboratory chemicals and Reagents we are committed to customer service and to have a clear vision on Quality without Compromise.

More than 1500+ products in ready stock we strive to take care of the timely and prompt Delivery and execution of orders.

Looking forward, we have merely reached the next level that each member of our company needs to focus on. Ensuring that the company will support by itself a sustainable growth regardless of external factors. We have the key success elements necessary to withstand the winds of change

Our well-recognised market presence with a broad product portfolio, which is being marked up with newer product ranges and efficient manufacturing capabilities that boasts of high quality production and cost effectiveness.

Finally we would like to thank all our present customers and Distributors all over the Globe for making 2019-20 as one more successful year in our Success history.

We look forward for more business in the upcoming years.

# Grades of Purity

## **ANALYTICAL REAGENT (AR)**

Our AR grades products confirms to the highest purity for Analytical and Research work. The trace impurities are limited to the lowest limits for the reliable use in Laboratory and Pharma Industries. These reagents complies maximum test results for AR and ACS grades.

## **FOR SYNTHESIS LR, Extra Pure & Purified**

General purpose reagents having majority potential applications in chemical laboratories.

## **LABORATORY REAGENT (LR & E.P.)**

Products with grades Pure, Extra Pure, Purified have majority potential applications in chemical laboratories and our most of the products act in accordance with Pharmacopeia to be majorly used in Pharma Industries.

## **HPLC GRADE**

This grade covers Solvents and reagents in wider range of application areas, particularly for biomolecular and ion separation. Key parameters such as UV absorbance, transmittance, non-volatile matter, moisture content, fluorescence impurities and assay are very carefully controlled.

## **FOR MICROSCOPY (M.S.)**

This range of stains and reagents are used in clinical diagnosis and Haematology examinations. Microscopy stains are standardised by UV spectrum and controlled by TLC.

## **FOR BIOCHEMISTRY**

These are Highly Purified Reagents used in Biochemical research and analysis. They are free from inhibits such as traces of heavy metals and tested with a view for Biochemical work. The range covers amino acids, buffers, enzymes and derivatives.

## **FOR MICROBIOLOGY**

This grade covers Products which have been specially purified and tested for their microbiological applications which are free from toxic inhibitors and ensure favourable microorganism growth in culture media.

## **DIAGNOSTIC REAGENTS**

These reagents are specially produced for the use of various hospitals, clinical & pathological laboratories for diagnostic purpose.

## **FOR MOLECULAR BIOLOGY**

These reagents are additionally verified for suitability in Molecular biology and identification Results of microorganisms.
