

Petri Dishes and Contact Dishes

In different sizes and formats

Greiner Bio-One offers petri dishes with diameters of 35, 60, 94, 100 and 145 mm. Manufactured from highly transparent polystyrene (PS), they are heat-resistant up to 60 °C for use with hot agar. Depending on the application vented and non-vented design can be selected.

Besides the standard round design, a square-profile dish (120 mm x 120 mm x 17 mm) and the OneWell Plate™ in SBS format are available.

Furthermore, Greiner Bio-One offers contact dishes which are used with hygiene monitoring including detection of contaminations as well as testing the effectiveness of cleaning and disinfection on plane surfaces by means of contact cultures.

The product range is completed by a special model with two compartments which enables parallel experiments with different samples or parameters in one dish.

Key Facts Petri Dishes

- Available in different sizes
- Easy stacking
- With or without vents
- Manufactured from crystal clear PS
