

Specification

1.00093.0010 FRASER Listeria Selective Supplement

Growth promotion test in accordance with the current version of DIN EN ISO 11133.
Mixed inoculum of Listeria, E.coli and E.faecalis
Additionally monoculture of E.coli and E.faecalis
Confirmation on ALOA® medium resp. Tryptic soy agar

	Specification
Inoculum on reference medium (Listeria monocytogenes ATCC 13932 (WDCM 00021))	≤ 100
Inoculum on reference medium (Listeria monocytogenes ATCC 35152 (WDCM 00109))	≤ 100
Inoculum on reference medium (Enterococcus faecalis ATCC 19433 (WDCM 00009))	≥ 1000
Inoculum on reference medium (Escherichia coli ATCC 25922 (WDCM 00013))	≥ 1000
Inoculum on reference medium (Escherichia coli ATCC 8739 (WDCM 00012))	≥ 1000
Inoculum on reference medium (Enterococcus faecalis ATCC 29212 (WDCM 00087))	≥ 1000
Blackening (Listeria monocytogenes ATCC 13932 (WDCM 00021))	+
Blackening (Listeria monocytogenes ATCC 35152 (WDCM 00109))	+
Blackening (Escherichia coli ATCC 25922 (WDCM 00013))	-
Blackening (Escherichia coli ATCC 8739 (WDCM 00012))	-
Blackening (Enterococcus faecalis ATCC 19433 (WDCM 00009))	-
Blackening (Enterococcus faecalis ATCC 29212 (WDCM 00087))	-
Growth on ALOA® medium (Listeria monocytogenes ATCC 13932 (WDCM 00021))	> 10 colonies
Growth on ALOA® medium (Listeria monocytogenes ATCC 35152 (WDCM 00109))	> 10 colonies
Colonies (Listeria monocytogenes ATCC 13932 (WDCM 00021))	blue green colonies with opaque halo
Colonies (Listeria monocytogenes ATCC 35152 (WDCM 00109))	blue green colonies with opaque halo
Growth on Tryptic soy agar (Escherichia coli ATCC 25922 (WDCM 00013))	total inhibition
Growth on Tryptic soy agar (Escherichia coli ATCC 8739 (WDCM 00012))	total inhibition
Growth on Tryptic soy agar (Enterococcus faecalis ATCC 29212 (WDCM 00087))	< 100 colonies
Growth on Tryptic soy agar (Enterococcus faecalis ATCC 19433 (WDCM 00009))	< 100 colonies

Specification

1.00093.0010 FRASER Listeria Selective Supplement

Incubation:

Fraser Broth: 48 ± 2 hours at $37 \pm 1^\circ\text{C}$

Confirmation on ALOA® medium: 44 ± 4 hours at $37 \pm 1^\circ\text{C}$

Confirmation on Tryptic soy agar: 24 ± 3 hours at $37 \pm 1^\circ\text{C}$
